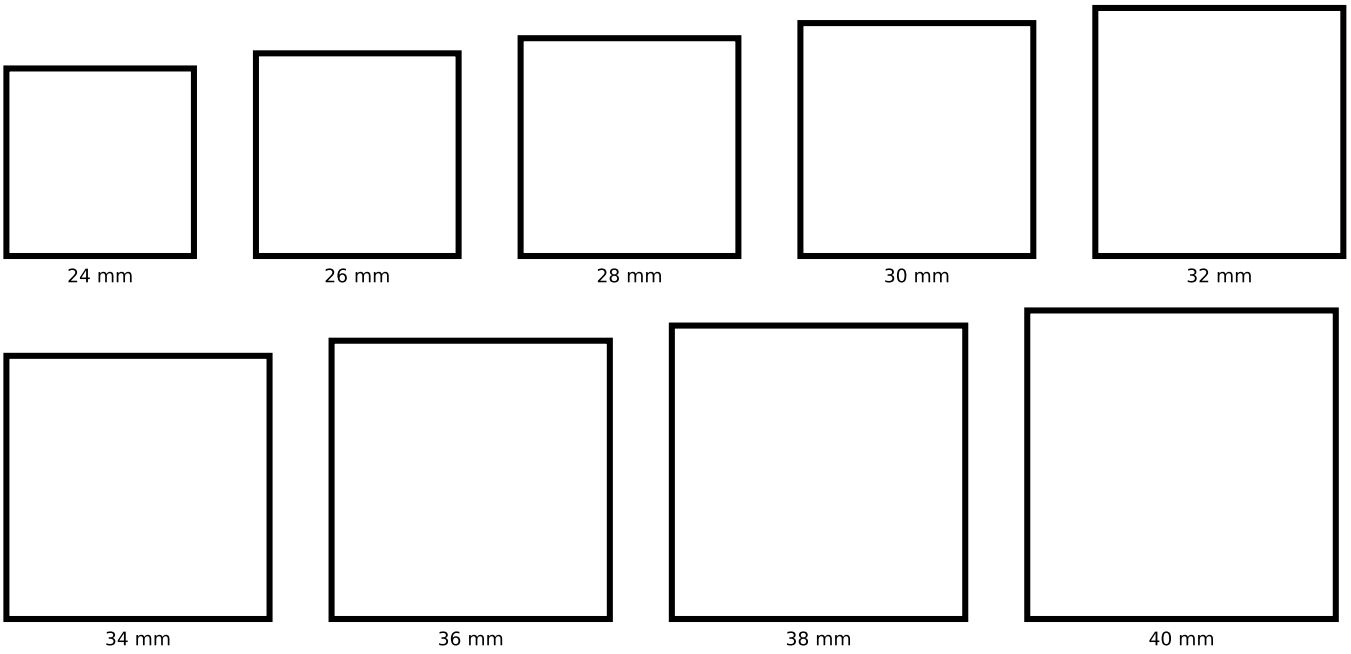
Block Edge Check Sheet

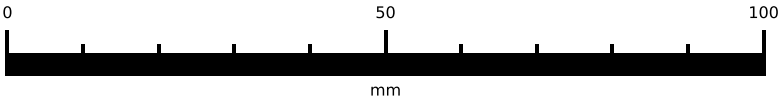
Print at 100% / ACTUAL SIZE. Do NOT use "fit to page" or any scaling.

Lay a block flat on each outline. The frame whose INNER edge the block fills exactly is its edge length.

Frame too big -> gaps at the sides. Frame too small -> the block covers the line. Neighbours differ by 2 mm.



VERIFY THE SCALE: this bar must measure exactly 100.0 mm.



If the bar measures 97 mm the sheet is at 97%, and every frame above is 0.97 x its label.

If it measures 100 mm, the labels are the true sizes.

Sheet 210 x 297 mm, frames drawn by their INNER edge (line width grows outward).
